

# HEALTH PARTNER

Connecting patients and doctors for proactive wellness

## HEALTH AND ACCESSING MEDICAL SUPPORT IS STILL COMPLICATED FOR MOST PEOPLE

- **No Unified Health Tracking**  
People use multiple apps/devices, leading to scattered health data
- **Delayed Medical Attention**  
Users struggle to understand early symptoms and when to seek help
- **Difficult Appointment Booking**  
Finding the right doctor, available slots and trusted clinics
- **Lack of Personalized Insights**  
Health apps show data but don't convert it into actionable guidance
- **Poor Continuity of Care**  
Doctors don't receive your previous data, causing ineffective consultations

50B+  
OPPORTUNIT

# THE SOLUTION

## Unified Online Platform

Streamlined appointment scheduling for all.

## Doctor & Admin Control

Manage availability, earnings, and system oversight.

## Real-Time Booking

Patients book instantly with live doctor availability.

refer to the needful

## ACTUAL USE CASES

Health Partner, a healthcare and wellness platform that allows **Patients** achieve basic health goals and maintain compliance with preventive checkups

**Sunita, a working professional**, wants to track her daily steps, sleep hours, and preventive-care reminders. Health Partner helps her stay consistent and ensures she never misses important checkups.

**Dr. Arjun Kapoor, a healthcare provider**, can easily view assigned patients, track their compliance status, and manage appointment requests seamlessly.

HEALTH

# USER PERSONAS

## Dr. Arvind Kapoor

AGE 45  
EDUCATION Masters (MD - Internal Medicine)  
STATUS Single  
OCCUPATION Senior Consultant Physician  
LOCATION India

### Personality

Extrovert Reader  
Spender Tech-savvy

### Bio

Experienced physician with 18+ years in hospital and private practice  
Manages a high patient load daily and values digital efficiency  
Believes in preventive care, patient education, and structured follow-up

### Core needs

- A dashboard that shows all patient appointments clearly
- Easy way to manage, reschedule, or cancel appointments
- Secure access to patient details and medical history

### Frustrations

- Too many scattered appointment messages across WhatsApp/SMS
- Manual scheduling errors by hospital staff

### Challenges

- Limited time to use complex apps
- Needs very fast authentication and minimal steps
- Must ensure patient data privacy and compliance

## Sunita Sharma

AGE 28  
EDUCATION Masters  
STATUS Single  
OCCUPATION Software Engineer  
LOCATION India

### Personality

Extrovert Reader  
Spender Efficiency-driven  
Tech-savvy Analytical

### Bio

Works a full-time tech job with long hours and irregular schedule  
Visits doctors occasionally for preventive checkups  
Prefers online interactions over calling clinics

### Core needs

- Simple interface to book new appointments quickly
- Real-time confirmation and reminders
- Ability to view previous appointments or reports

### Frustrations

- Long waiting times to confirm appointments
- Overly complicated hospital websites with too many steps

### Challenges

- Often forgets follow-up appointments
- Needs a mobile-friendly experience
- Wants data security and trust in the app
